Plant late cabbage two and a half feet apart each way.

Coffee at 1c a Pound.

The berries ripen in about 4 months from time of planting and produce a crop of from 20 to 30 bushels to the acre, and are as easily grown as beans; when roasted and ground it closely resembles coffee and tastes quite similar. Some mix half and half with coffee and claim it is superior. Its great value to the farmer lays in the fact that when ground it makes one of the most valuable crops for feeding stock and adds greatly to the milk production. Claimed also to be much superior to clover for fertilizing the soil and pasturing, or feeding, of which it frequently yields eight to ten tons per acre, or it may be planted in drills three feet apart and two feet apart between plants. Per large pkt 10c, 3 pkts 25c, ½ lb 20c, lb 35c, postpaid.

The yield of this Tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of ten feet and nine feet across. The Reliable Incubator and Brooder Co.

Are Headquarters for Anything
You want in the Poultry Line.

WE are recognized by the expert poultry breeders and farmers all over the world as making the very best line of Incubators, Brooders and Poultry Appliances and have been the means of making it possible "Why Poultry Pays, and How to Make it Pay," that which is most important is an Incubator and Brooder which is perfectly reliable; an Incubator that will hatch every fertile egg, a Brooder which saves and pushes it

along to healthful maturity. There is only one "Best" or one which will meet all these requirements, and that one is the World Famous **Reliable Incubator and Brooder**. They are built exactly right and have given more money-making poultrymen perfect satisfaction than any three machines made.

MEXICO CITY, MEXICO, Sept. 27, 1899.

RELIABLE INCUBATOR & BROODER CO., Quincy, Ill.

Gentlemen—I have bought over \$2,000.00 worth of goods from you. I am using Incubators of all the American and European systems, but the ones you make are the ones I prefer, because they are the only ones that moisten the air before it enters the egg chamber and no other manufacturer has taken into consideration that we are at a height of 5000 feet above the level of the sea and the air is rarified.

R. R. DE ALTAMIRA.

Our regulators on the **Reliables** will regulate to a fractional part of a degree. They have perfect ventilation. **No sloppy moisture pan system, as no moisture is used.** We claim the Reliable is the only Incubator that has the moisture question exactly right, as our process of conditioning the air for hatching more nearly reproduces the condition under the hen. See one of the many letters that help to convince us of this fact. Get our prices.

Our Twentieth Century Poultry Book tells how successful men make the business pay, and is written from a practical, every-day experience standpoint, and is worth a dollar to any one interested in poultry, but we send it **FREE** if you will send 10c to pay postage.

Address,

Reliable Incubator and Brooder Co., **QUINCY, ILL.**
